

John Crippen Design – Website Development Agreement

Before you decide to use me as your web designer, I'd like to tell you a little bit about my style of design. I like a website to be clean and snappy. I do not like to add too much flash or other items that can slow a system down. My goal is to keep them interested in you content and your product. Often times, people loose their sense of connection to sluggish, and often annoying widgets that slow down the exploration and information process. I believe in crisp design and an encompassing theme that signifies you as a relevant brand. A good design will leave a lasting impression in the mind of your potential customers. I like to have a lot of contact information and a small bio on you and/or your business. I do not like to bury web pages more than three deep and would rather rely on excellent website structuring. Excellent images are a must. Please take a look at a couple of my websites to get the look and feel of my style before you make a decision... [www.photo-scenix.com](http://www.photo-scenix.com) or [centralcoastmarketing.org](http://centralcoastmarketing.org) are both good examples of my philosophy. Thank you for taking the time to read this, too.

Pricing can be either by the hour (\$50.00 with a minimum of four hours) or we can do a consultation and work out a comprehensive bid for the completed project. Monthly maintenance starts as low as \$50.00 a month as long as it does not exceed one hour or cost me any travel/material expenses. I am not responsible for any hardware or software malfunctions including viruses, malware, or other such malicious code .
